

## Research Security Fund-Performance Objectives for 2023-24

Project Title	Output (investment of research security funds)	Performance objective	Performance indicator	Target outcome	Reported outcomes
Foster a Culture of Research Security Awareness	Projected percentage of Research Security grant invested in supporting the project: 100%	<ul style="list-style-type: none"> <li>• Actively participate in national research security initiatives to stay informed about policies and guidelines and share relevant information with the TRU community.</li> <li>• Facilitate information sessions on “Safeguarding Science” with the regional Research Security Centre to raise awareness among faculty, students, and staff about research security requirements and identify potential suspicious partners/activities.</li> </ul>	Measure faculty, student, and staff engagement by tracking attendance and the overall participation rate in information sessions.	Increased Awareness: Faculty, staff, and students have a clear understanding of potential research security risks and mitigation strategies. They are familiar with the compliance requirements outlined in the National Security Guidelines for Research Partnerships.	<p>The Research Security staff actively participates in the monthly Canadian university research security Community of Practice (Team Canada), as well as in special presentations from government security agencies, service providers, and university research security offices. They share information with stakeholders on the campus.</p> <p>Safeguarding Science workshop is rescheduled for April 2025.</p>
